

## Planning 2: Providing topics by outstanding young researchers in world textile engineering

**Dr. Hua Shen**  
(College of Textiles in Donghua  
university)

1. Lecture topic:  
**The heat and flow transfer through porous fibrous material**
2. Lecture style:  
**On – demand**

### Speakers Biography

Dr. Hua Shen was born in China. After his master education at Donghua University in China, he moved to Japan and got his PhD from Kyoto Institute of Technology. He currently works at College of Textiles in Donghua university and mainly study the new fibrous materials and the thermal properties of textiles. He has several projects and grants from government and textile industry.
